

May 2025-April 2026 APF

Greetings from your team at Westside Pediatrics!

As we look forward to our 29th(!) year, we at Westside Pediatrics remain committed to providing your children with the highest level of care. We continue to be an independent practice that accepts most insurance plans, and are confident that our practice model remains the best way for us to provide outstanding, personalized, accessible care for your family. Our Annual Practice Fee (APF) is essential in maintaining this model.

We respect that everyone's health care costs come at a significant expense. Our Annual Practice Fee (APF) will **not** increase in 2025 and continues to be capped for families of three or more. The May 2025 through April 2026 APF will remain \$350 per patient, with a family maximum of \$850. This is due in the month of May. The APF is waived for the first 12 months of life, and is not automatically charged to your credit card on file. [Please click here to pay your APF.](#)

We remain honored and thankful for our trusted relationships and the opportunity to care for your family.

If you feel this fee represents an undue burden, please contact our office administrator at APF@wppc.pcc.com.
